

Bill of Materials

AeroStep Runner / Style S-042 / Product engineering release

Document ID	BOM-S042-REV3	Issue date	28 August 2026
Status	Controlled copy	Prepared by	Compliance Office

Product scope

This controlled bill of materials identifies the primary components approved for the AeroStep Runner sample, style S-042. Quantities are expressed per pair and are intended for traceability demonstrations.

Component	Material specification	Supplier / reference
Upper	Full-grain bovine leather, finished, 1.4-1.6 mm	LeatherWorks Italia / L-18
Lining	Recycled polyester mesh, 120 g/m2	Nova Textiles / NT-204
Outsole	Natural rubber compound, carbon black free	RubberForm / RF-88
Insole	Molded EVA foam with textile cover	Nova Components / NC-17

Revision note

Revision 3 clarifies the approved outsole material. Any supplier substitution requires written product engineering approval before production release.
